Multifunction Power Meter 96\*96

## Description

The TMM-20 series Multifunction Power Meter provide high accuracy measurement, display and communication (Modbus RTU) of all electrical and power quality parameters, including harmonic measurement THD(Total Harmonic distortion)

Provides electricity bill ratio (Cost) and carbon dioxide ratio (Co2) set can show cumulative electricity bills and carbon emissions, and suitable for the installation in the power management of remote communication, such as the use of demand.

## Multifunction Power Meter 96\*96

### Description

TMM-70 multifunction power analyzer provide high accuracy single phase and three-phase energy measuring and displaying, energy accumulating, power quality analysis, data logging and data communication.

TMM70 series meters are able to measure bidirectional, four quadrants kWh and kVarh. It provides maximum/minimum records for power usage and power demand parameters.

Hardware standard built in a RS485 Modbus communication port, 4 Digital inputs, 2 Relay outputs, LCM and 2 MB flash for data-logging. In addition , also provide TOU , voltage and current THD, harmonics up to the 31st and auto wiring change via software.

## Description

Twenty digits in the top of display area: Display mode indication.  
Four line of 8 digits in the metering area : Display metering data such as Voltage, current, power, power factor, frequency, unbalance, etc.  
Four line of 8 digits in the metering area :Display metering data unit.  
Three line 8-8 digits:1, 2, 3 for 3 phase ;1-2, 2-3, 3-1 for 3 phase line to line.  
Nine 8 and five digits:Display energy data and unit.  
Also display real time o'clock.
