

Digital Electronic Over Current Relays

New Digital EOGR with Communication

Digital Type

- Improved measurement accuracy (1% Class)
- High-frequency component filtering (leakage, ground fault)
- High Sensitivity, Instantaneous Operation / Leakage Current Protection (30msec / 30mA)
- Harmonic Distortion Measurement (THD) and Alarm Output
- Temperature / Humidity sensor built-in
- LED on the main unit indicates operation / stop / trip
- Modbus-485 communication (up to 200 connections possible)
- Protection against short-circuit of the power source due to transient voltage and alarm output

- 3DM2 / FDM2
- i3DM / iFDM
- i3M420/iFM420

- Monitoring
- PDM

- Current transformer
- 100 ~ 960A

EOCR-SE2/SS/SSD/DS3(T)

- Electronic motor protection relay
- New technology against thermal overload relays
- Easy to use

SMART EOGR enhances existing protection and incorporates customer requirements

▶ Monitoring THD and alarm output

▶ Communication, Monitoring
Modbus-485 Communication (up to 200 connections possible)

Public Construction

Features

- Compact Design
- MCU Based
- Multiple Protection Functions
- Wide Current Adjustment Range (10:1)
- Ammeter Function & Trip Indication
- Easy Troubleshooting & Run Monitor
- Manual Instantaneous / Electrical Remote Reset
- Test Function
- Ambient Insensitive
- Fail-safe Operation

Over-current Protection

Over-current protection is provided by tripping the relay when motor operating current (I_n) exceeds over-current setting (I_s) of EOCR for a period longer than the preset operating time (O-Time).

Phase Loss Protection

During a phase loss, the motor winding current may increase by 150% or more. As the motor winding current increases, the winding temperature may increase and possibly damage the winding insulation. The quick trip time on EOCR helps to prevent over-current damage to the windings.

Ammeter Function & Trip Indication

Indication LED on the dial plate provides trip indication and ammeter functions. The LED starts to flash at the point where motor current is equal to current setting level (I_s), so user can verify motor current by reading the LOAD adjustment scale on the dial plate. This also provides an accurate current setting. The LED is illuminated when motor current exceeds current setting (Overload Status). After tripping has occurred, the LED stays on until the relay is reset. The trip indication is also an important feature of a multiple relay & contactor (starter) installation.

Manual / Electrical Remote Reset

Manual Reset : Pushing RESET button on the dial plate or interrupting power supply provides manual instantaneous reset.

Electrical Reset : Electrical remote reset is also provided by panel-mounted RESET button.

Low Energy Consumption

EOCR-SS uses only 250mA of power, much less than thermal bimetallic overload relays. The result is significant cost savings over the life of relays up to 20 times cost saving than TOR (Thermal Overload Relays)

Wide Adjustable Range

EOCR has a wide current adjustment range of over 10:1. It enables three type models to cover a wide range from 0.1A up to 600A thus reducing the number and type of relays that must be inventoried for spare purposes.

Looping Option

Some motor size may require only one-third or one-fourth of particular EOCR current range. These installations can be accommodated by looping the motor wire 2 or 3 times through the integral current transformers of the EOCR. This reduces the number and type of relays inventoried for spare purposes. Each additional loop will increase the current measured as indicated by the following chart.

Type	No. of Loops	Time of Passing	Current Set. Range(A)
Looping Option	0	1	0.50~6.0A
	1	2	0.25~3.0A
	2	3	0.17~2.0A
	3	4	0.12~1.5A
	4	5	0.10~1.2A

Option for External Current Transformer

05 type of each model fitted to an external current transformer and can achieve higher ampere ranges. (Ext. CT Option)

	Type	Current Ratio of Ext. CT	Current Setting Range
	05	—	0.5~6A
Ext. CT Option	100	100 : 5	10~120A
	200	200 : 5	20~240A
	300	300 : 5	30~360A
	400	400 : 5	40~480A

General features

- Micro-controller unit based
- Real time processing / High precision
- Protections : Over current, Under current, Phase loss, Phase reversal, Stall, Jam, Current Imbalance
- Thermal protection / Inverse available up to 32Amps without external CTs.
- Auxiliary functions : Fail safe, Pre-alarm (3DM2-Z/FDM2-Z), Accumulated running hour, 3 faults records & limitation of auto-restart.
- Bar graph indication of a load current to the current setting.
- Available application on single and 3 phase motor
- RoHS Compliance
- For FDM2-Z, normal protections are guaranteed even if PDM is disconnected.

Specifications EOCR-3DM2-Z / FDM2-Z

		O-time	0.2~30s	
	Auto-reset		0.5s~20min.	
	Reset mode		Manual reset (H-r) / Electric reset (E-r) / Auto-reset (A-r)	
Tolerance	Current	1 < 1A : $\pm 0.05A$, $1 \geq 1A$: $\pm 1\%$		
	Time	$1 \leq 3s$: $\pm 0.2s$, $t > 3s$: $\pm 1\%$		
Control power	Voltage	100~240VAC/DC (85% ~110%, Free voltage), 24VAC/DC ($\pm 5\%$) .		
	Frequency	50/60Hz		
	Power consumption	Lower than 5VA (3W)		
Output	Capacity	3A/250VAC resistive.		
	Composition	1a1b : OC		
		1a : AL (i3DM-Z / iFDM-Z) 4-20mA (i3M420-Z / iFM420-Z)		
Display	7 segment LED	3 phase amps, Cause of trip, Setting parameters indication.		
	Bar-graph	Load factor.		
Communication		Modbus/ RS-485		
Mounting		Panel mounting (i3DM-Z / iFM420-Z)		
		Flush mounting (iFDM-Z / iFM420-Z)		
Insulation	Between case & circuit	Over DC500V 10M Ω		
Dielectric strength	Between case & circuit	2kV, 50/60Hz, 1 Min.		
	Between contacts	1kV, 50/60Hz, 1 Min.		
	Between circuit	2kV, 50/60Hz, 1 Min		
Electrostatic discharge (ESD)	IEC61000-4-2	Level 3 : Air discharge : $\pm 8kV$, Contact discharge : $\pm 6kV$		
Radiated disturbance	IEC61000-4-3	Level 3 : 10V/m, 80 ~ 1000MHz		
Conducted disturbance	IEC61000-4-6	Level 3 : 10V, 0.15 ~ 80MHz		
Surge	IEC61000-4-4	Level 3 : $\pm 2kV$, 1 Min.		
EFT/Burst	IEC61000-4-5	Level 3 : 1.2 x 50 μs , $\pm 4kV$ (0°, 90°, 180°, 270°)		
Emission	CISPR11	Class A (Conducted and radiated)		
Environment	Temperature	Store	-40°C ~ +85°C	
		Operation	-20°C ~ +60°C	
	Humidity	30~85% RH (Non-condensate)		
Dimension	Window type	70W x 74.5H x 83.8D		
	Bottom hole type	70W x 56.3H x 108.1D		
Weight			i3DM-Z/i3M420-Z	iFDM-Z/i3M420-Z
	Window type	330g		420g
	Bottom hole type	370g		460g
	Terminal type	370g		460 + 120(PDM) = 580g
	Display (W/3M cable) note.1	—		125g

Note: 3M cable is the standard option, and customized 5M cable is available upon request. For delivery lead time, please contact regional sales office.
